Fertility Insights: Fertility and Fertility Preservation

We invite you to join us for this free lunchtime talk,
to be presented by **Professor Bill Ledger,**
Director of Reproductive Medicine,
Royal Hospital for Women, Randwick.

In this presentation we will explore the science and the facts behind preserving fertility through egg freezing, IVF, and fertility options for same sex couples. We ask why egg freezing might be a good idea, who should (and should not) consider it, what you'd have to do and how well it might work. We will also end with a look into the future of fertility medicine.
